SUMMARY

A Full-Stack Developer and UX/UI Designer driven by a simple question: How can complex things feel simple? With a hybrid background spanning software engineering, graphic design, and photography, I build digital experiences that are robust under the hood and intuitive on the surface. I don't just hand off designs to developers—I build them. I ensure that high-end minimalist aesthetics and smooth animation curves align perfectly with brand identity, while optimizing backend performance so that API response times match the speed of thought.

WORK EXPERIENCE

Full-stack Developer, Meeting Creative Co., Ltd.

Mar 2024 – Present

- Develop and maintain end-to-end web applications, ensuring seamless integration between intuitive frontend interfaces and reliable backend architectures.
- Bridge the gap between design and development by independently handling UX/UI design processes and translating them into pixel-perfect, highly optimized code.
- Deliver modern, responsive digital solutions for various clients, enhancing both system performance and overall user experience.

Internship, Meeting Creative Co., Ltd.

Oct 2023 – Feb 2024

- Designed user interfaces, wireframes, and prototypes focusing on user-centric design principles.
- Implemented frontend components and responsive layouts, collaborating closely with the team to meet core project requirements and aesthetic standards.

KEY PROJECTS

CAMRI E-Learning Platform (Thai Teen Training) | Next.js, Laravel, REST API

- Developed the frontend architecture and integrated APIs for an e-learning platform dedicated to mental health professionals.
- Engineered comprehensive assessment modules, including Pre-tests, interactive in-video quizzes, and Post-tests.
- Implemented an automated certificate generation system upon successful course completion, enabling instant digital delivery.

Vongchavalitkul University Website | Next.js, Laravel, REST API

- Developed the frontend interface for the university's official information and news portal.
- Integrated backend APIs to fetch and render dynamic content, ensuring a fast, responsive, and seamless user experience.

Commercial & Custom Web Platforms | Laravel, PHP, MySQL

- Served as a Full-Stack Developer to build end-to-end web applications for diverse industries, including corporate profiles, e-commerce, and major automotive dealerships (e.g., Toyota, KIA, Hyundai, Ford).
- Engineered secure and high-performance Laravel backends by implementing RBAC for permission management and optimizing media storage with Laravel Media Library.

EDUCATION

Bachelor of Faculty of Engineering and Technology

2021 – 2025

- Rajamangala University of Technology Isan
Major in Computer Engineering
- Final CGPA: 2.56

Diploma (High Vocational Certificate) in Electrical Control

2018 – 2020

Nakhon Ratchasima Technical College

KEY SKILLS

- React
- Next.js
- Nuxt
- React Native
- Flutter
- Tailwind
- Framer Motion
- HTML
- CSS
- JavaScript
- PHP
- MySQL
- VS Code
- Postman
- Git
- Figma
- Wireframing
- Prototyping
- Adobe Photoshop
- Adobe Illustrator
